Dear Sir:

Reply to Restriction Requirement

This is a reply to the Restriction Requirement mailed October 2, 2003 setting a one (1) month statutory period for response. Please enter the following remarks into the record.

Remarks begin at page 2.

Attorney Docket No.: DEX-0249 Sun et al. Inventors: 10/082,830 Serial No.:

October 29, 2001 Filing Date:

Page 2

REMARKS

Claims 1-17 are pending in the instant patent application. Claims 1-17 have been subjected to a Restriction Requirement as follows:

Group I, claims 1-5, 7-9, and 15, drawn to an isolated nucleic acid, classified in class 536, subclass 23.1;

Group II, claims 6 and 14, drawn to a hybridization method for determining the presence of breast specific nucleic acid (BSNA), classified in class 435, subclass 6;

Group III, claim 10, 11 and 15, drawn to an isolated polypeptide, classified in class 530, subclass 350;

Group IV, claims 12, drawn to an antibody, classified in class 424, subclass 130.1;

Group V, claims 12, 14, drawn to a protein binding assay for determining the presence of breast specific nucleic acid, classified in class 435, subclass 7.1;

Group VI, claim 16, drawn to a method of treating a patient with drug, classified in class 514, subclass 12; and

Group VII, claim 17, drawn to a vaccine, classified in class 424, subclass 184.1.

The Examiner suggests that these Groups are distinct, each

Page 3

from the other.

Specifically, with respect to Groups I, III, IV and VII, the Examiner suggests that the claims of these Groups are drawn to unrelated products.

With respect to Groups I and II, IV and Groups III, IV and V, VI, the Examiner has acknowledged their relationships as product and process of use. However, the Examiner suggests that these Groups are distinct because the products can be used in materially different processes.

With respect to Groups II, V and VI, the Examiner suggests that the Groups are unrelated methods.

Further, the Examiner suggests that each of the above Groups reads on patentably distinct sequences and has requested that Applicants further elect a single amino acid of single nucleic acid sequence.

At the outset, clarification is requested with respect to claims encompassed in Group V. The Examiner suggests that Group V, claims 12, 14 are drawn to a protein binding assay. respectfully pointed out, however, that neither of these claims are drawn to this subject matter. Further, claims 12 and 14 were included in Groups IV and II, respectively. Applicants believe that the Examiner meant to include only claim 13 in Group V.

Attorney Docket No.: DEX-0249 Sun et al. Inventors: 10/082,830 Serial No.:

Filing Date: October 29, 2001

Page 4

However, clarification of the record by the Examiner is respectfully requested.

Further, Applicants respectfully traverse this Restriction Requirement.

MPEP §803 provides two criteria which must be met for a restriction requirement to be proper. The first is that the inventions be independent or distinct. The second is that there would be a serious burden on the Examiner if the restriction is not required. A search of prior art relating to an elected nucleic acid, polypeptide or antibody would also reveal any references teaching uses for the nucleic acid, polypeptide or antibody. Accordingly, Applicants believe that searching of all the claims, at least when limited to elected nucleic acids, polypeptides, or antibodies, is overlapping and would not place an undue burden on the Examiner if the Restriction is not made.

Thus, since this Restriction Requirement does not meet both criteria as set forth in MPEP \$ 803 to be proper, reconsideration and withdrawal of this Restriction Requirement is respectfully requested.

In addition, with respect to the election of a single sequence, MPEP § 803.04 clearly states that a reasonable number of nucleotide sequences, normally ten sequences, can be claimed Attorney Docket No.: DEX-0249

Inventors:

Sun et al.

Serial No.:

10/082,830

Filing Date:

October 29, 2001

Page 5

in a single application. Accordingly, withdrawal of this sequence election requirement and reconsideration to include a more reasonable number of at least 10 sequences in accordance with MPEP § 803.04 is also respectfully requested.

However, in an earnest effort to advance the prosecution of this case Applicants elect Group I, claims 1-5, 7-9 and 15 with traverse. Further, Applicants elect SEQ ID NO:99 encoding SEQ ID NO:224, with traverse. Since SEQ ID NO:98 is a sub-sequence of SEQ ID NO: 99, it is respectfully requested that at least SEQ ID NO:98 be included in this case as well.

Applicants believe that the foregoing comprises a full and complete response to the Office Action of record.

Respectfully submitted,

Date: November 3, 2003
